

Pimples gone in 24 hours. Wrinkles relaxed in days. Healthy skin for life.  
Experiment w/ services at this weekend's Wellness & Beauty Expo

(For release: Sept. 28, 2012/Spokane, WA)

This weekend is your chance to try all kinds of services for skin care, health and wellness. You have full access to Dr. Gwyn and her team from Rejuvenate Rx at the Wellness and Beauty Expo in Spokane Valley. This is not your typical trade show... you won't just be walking around, "looking" at exhibits. You'll actually get to **experience** services and care.

Dr. Gwyn says, *"I'm so excited to collaborate with Ann Marie [the event producer]. She has an amazing story of survival and a long history in Spokane."*

Rejuvenate Rx is one of several vendors at your service this weekend: today - Sunday. Dr. Gwyn Blattau-Gay has some awesome services planned for you at the expo:

Skin Scope:

Allows Dr. Gwyn to see & show you how healthy your skin is at a much deeper level. She'll find the challenges and create solutions:

→ Excessive oil production / Dehydration / Sun damage

Juvederm Simulator:

Ever wonder what you'd look like with a little plumping from Juvederm? Now you can.

Express facial:

Deeply cleanses, exfoliates and hydrates the skin

Cryotherapy:

Exfoliates, kills bacteria, shrinks pores

All the vendors are planning activities, demonstrations, free wellness checks, mini spa & beauty treatments, healthy and delicious food. Plus there'll be prizes every hour.

The founder of the Wellness and Beauty Expo is Ann Marie Danimus, former Miss Spokane, world traveler and business owner, and survivor of a few, nearly fatal, health crisis. Now she and her mom have teamed up to run Stubborn Girl Productions.

Dr. Gwyn praises the expo, *"I love it that Ann Marie went through her own health issues and is now using that experience to serve the community."*

Plus, Dr. Gwyn is excited to show you that you can be healthy on the inside and have smooth skin on the outside, *"...yes, even this is possible; with our expertise, wisdom, injections, and SkinCeuticals products. It's not painful, super expensive, or time consuming."*
