

REJUVENATING YOUR SKIN CAN BE LIFE CHANGING... We're serious.
NATIONAL HEALTHY SKIN MONTH... it's perfect timing.

(November 2, 2012/Spokane, WA)

Innovations in skin care mean it's now even easier to improve your health, confidence, and appearance. Dr. Gwyn Blattau-Gay is new to the Spokane area (from the East Coast). She mixes her past focus on internal medicine with extensive training in skin care to create the most effective solutions for your skin challenges. In honor of National Healthy Skin Month, Dr. Gwyn and her team at Rejuvenate Rx are giving away gift certificates on 92.9 ZZU. Listen to Dave, Ken, and Molly during your morning drive, next week (Nov. 5-9).

This is the first time families in Spokane have had access to this kind of skin care. Patient, Erica Hallock, has suffered from adult acne and aging skin for the past fifteen years! She says she's wasted all kinds of time and money on dermatologists, facials, and various products, but finally found a solution with Dr. Gwyn, *"my face transformed immediately! I had thought a MicroPeel would leave my face hurting, and instead it feels as soft as baby's skin. Amazing. Instant. And a lot of my skin problems are just gone immediately."* Hallock says clear skin boosts her confidence and morale, both helpful personally and professionally.

Dr. Gwyn says the MicroPeel is just one solution to healthier skin, *"When performed in a series of 4-6 procedures has been shown to have clinical results comparable to a high-cost mid-dermal chemical peel; yet at a much lower cost and without any downtime for post-procedural healing."*

Dr. Gwyn and her clinical esthetician provide physician directed skin care. It's more than dermatology. More than a medical spa. Dr. Gwyn is specially trained, and also approved to offer SkinCeuticals products (medical-grade skin care). This is the perfect month to raise awareness and educate her community about gaining healthier skin and protecting your youthful appearance. *"By November, we're coping with all kinds of sun damage when our patients haven't used enough sun block or kept themselves hydrated. Plus, we have to prepare and protect our skin for the harsh winter months."*

Rejuvenate Rx provides physician directed skin care and convenient medical care. For lively, interactive interviews, please contact Valerie Bacon at 509-325-3623 or Valerie@letitshinemedias.com.
